

Botanical Bento

Weekly Care Routine

Week of: _____

■ SUNDAY - Ground Floor Layer

■ 15-20 min

- ☐ Check soil moisture 2-3 inches deep
- ☐ Water if dry (typically every 7-10 days)
- ☐ Rotate pots 90° for even growth
- ☐ Wipe large leaves with damp cloth

■ TUESDAY - Mid-Level Layer

■ 10-15 min

- ☐ Check moisture of top inch of soil
- ☐ Water if dry (typically every 5-7 days)
- ☐ Prune dead leaves or leggy growth
- ☐ Check for proper drainage

■ THURSDAY - Upper Canopy Layer

■ 10 min

- ☐ Water trailing plants
- ☐ Trim excessive vining growth
- ☐ Check for pests on undersides of leaves
- ☐ Adjust hanging positions if needed

■ SATURDAY - Micro-Zones & General

■ 10 min

- ☐ Water micro-zone elements as needed
- ☐ Mist humidity-loving plants
- ☐ Refill propagation stations
- ☐ Fertilize (every 2-4 weeks during growing season)

■ WEEKLY OBSERVATIONS

New Growth: _____

Pest Issues: _____

Plants Needing Repotting: _____

Other Notes: _____

■ *Tip: Adjust frequency based on season, humidity, and plant needs.*

■ *Remember: The 60% filled, 40% breathing room rule applies to care too—don't overdo it!*
